

Tuesday 17<sup>th</sup> March 2015

Walt: I can write a recount about our trip to The Cathedral.

Last week Class/one went to the cathedral.  
(To) meet a bee keeper. We wanted to learn about  
bees. First we looked at the <sup>stained</sup> stained glass windows  
they were bright and <sup>colourful</sup> colourfull. Next we looked  
around the cathedral we <sup>learnt</sup> ~~abot~~ about the bell  
and <sup>stroked</sup> stroked a <sup>brass</sup> brass mouse. Then we met the  
bee keeper and we talked about the <sup>bees</sup> bees. After that  
we saw the ~~queen~~ queen bee. Then we felt the  
<sup>wax</sup> bees waxes. Later on we made a bee hive use  
a hammer and <sup>nails</sup> nails. Finally we went outside  
to see the hives. My favourite part was when I stroked  
the mouse. Amazingly bees have one sting.  
Surprisingly bees only like <sup>certain</sup> some <sup>types</sup> types of flowers.  
Interestingly when a <sup>keeper</sup> beekeeper goes to a hive - he  
takes a smoker with him. ~~It~~ Strangely if a bee  
keeper wants to see where <sup>queen</sup> the queen bee is he marks  
her.
